Secrets of Shakespeare's last home, based on BBC Learning English – Words in the News

Rolling back centuries of speculation and digging deep into the private life of Stratford's favourite son. The soil, untouched for 400 years, and it's hoped - the key to understanding more about William Shakespeare's final days. By the time he moved to New Place, Shakespeare was already a household name. But little is known about how he spent the six years he lived here and that's what this latest dig is aiming to change.

Kevin Colls, University of Birmingham:

"I think we can learn little bits on what he was eating, what he was drinking, so his lifestyle. We can learn a little about his hobbies in terms of what he was doing with his time, but the great mystery has to be where he actually lived. Did he live in the grand house along the front of the street or did he live in the very secluded cottage hidden away from view to get on with his work?"

It's hoped excavating deeper than ever before will reveal even more about William Shakespeare's habits and shed new light on what inspired some of the most famous words ever written.
