Ancient Book, based on BBC Learning English – Words in the News

Fragments of an ancient manuscript found in Ireland are one of the most significant discoveries in archaeology for decades. Archaeologists are amazed that such a fragile ancient document could have survived for so long and that it was then discovered, because it could so easily have been overlooked or destroyed.

It was spotted by a construction worker who was using a shovel to dig into wet ground. After it was uncovered, the landowner placed damp soil over it to protect the book. First tests suggest that the book of psalms was written around 800 AD at a time of Viking attacks on Ireland. A fragment of Psalm 83 is legible but it will take much longer to read the whole manuscript. It's the first discovery of an early medieval document in two centuries.
